

CONTAINERS & BINS

No matter the job, Weaver SecurShred has the bins and containers to meet your needs!

Console Cabinets

The Regal 35" Cabinet looks like a piece of office furniture and blends nicely into almost any environment. Its small footprint (19" x 17" x 35") makes it great for placement almost anywhere. Its flat top easily accommodates items such as fax machines, printers or any other small office equipment. With a 90-pound capacity and advanced design, it holds huge quantities of paper and virtually eliminates loose paper inside the cabinet.

Collection Bins

The European-style collection bins are designed to provide high-capacity collection while maintaining a sleek, stylish look within any office setting. They come in a soft gray color that blends easily into most decors. They are available in two sizes. The 65-gallon bin utilizes an internal locking key mechanism and holds up to 250 pounds of paper. The 95-gallon bin utilizes an external hasp locking mechanism, high-quality Wilson Bohannon brass padlocks, and holds up to 350 pounds of paper.

Central Collection Containers

Our Central Collection Containers provide huge capacity for high volume offices or periodic purges. At 175-gallons and a capacity of up to 600 pounds, it can handle those times when the regular collection bins just aren't big enough. Still, with its four large (4") wheels on full-swivel castors, it moves surprisingly easily around the office and fits through standard size office doorways. Wheel it right to the storage room. No need to carry paper to the container!
